

# Christie J Purackal

Computer vision engineer

Email.:cjpurackal@gmail.com

Web.:http://cjpurackal.com

## Summary

Computer vision engineer interested in bridging the gap between traditional and modern CV approaches.

## Education

2013-2017

B.TECH IN IT

Cochin University of Science and Technology

## Skills

OS

GNU/Linux

LANGUAGES

C/C++, Python

FRAMEWORK

pytorch, libtorch, tensorflow, cuda, ROS

## Links

Github:// [cjpurackal](#)

## Experience

2019-PRESENT **SIW, Malaysia**

**Consultant, Computer Vision | SLAM**

- \* R&D on robot perception with a focus on mapping and localization in indoor environments.
- \* Work spanning on areas like sensor fusion, unsupervised object detection, visual attention, object detection etc.
- \* Evaluated and implemented multiple papers on clustering models based on mutual information maximization.

*ROS, pyTorch, Pangolin, C++, cmake, Tensorrt, CUDA, Ignition gazebo*

2018-2019 **Agrima (BigBasket), Kochi**

**Software Engineer(Team Lead)**

- \* Lead a team to build and ship inference APIs for recipe prediction(via food detection).
- \* Worked on various ML models for classification, detection and segmentation.
- \* Built data pipeline (labeling to inference APIs), internal framework for managing ML training and serving jobs.

*Keras, TensorFlow, docker, Kubernetes, Amazon Web Services (AWS), Google Cloud Platform (GCP), MLOps*

2018-PRESENT **Kerala Artificial Intelligence Initiaive, Kochi**

**Co-Founder**

An Open community dedicated to advancing AI research/awareness in Kerala.

*Community outreach, research*

2017-2018 **Lithion Power, Delhi**

**Software engineer**

- \* Implemented lane detection, road segmentation and vehicle detection algorithms for autonomous car project.
- \* Developed driver monitoring system to alert the driver for possible distraction or drowsiness.
- \* Responsible for data pipeline and administration.

*Autonomous Vehicles, TensorFlow, Flask, MEAN stack*

## Open source Projects

**Kornia**

**Collaborator**

Open Source Differentiable Computer Vision Library

**nice-slam-cpp**

**Author**

A cpp/libtorch implementation of Neural Implicit Scalable Encoding for SLAM

**m2det**

**Author**

Tensorflow 2.0 implementation of m2det object detection

...

More projects on [github](#).

## Achievements/Awards

**OpenCV Spatial AI Competition**

2022

**Top 25**

Selected as one of top 25 competitors for the opencv spatial ai track competition (Depth estimation on OAK-D Pro)

2013-2016 **ICTAK Techathlon | College level coding competitions**

Won ICTAK techathlon and various coding competitions held in colleges across Kerala
